## Syllabus for APC 310 <br> Math for Computer Science

NOTE: This syllabus document contains the basic information of this course. The most current syllabus is available in the full course.

## Course Description

This course covers topics that serve as the foundation for general computer science practice, including logic, sets, functions, mathematical reasoning, counting, probability, relations, graphs, trees, Boolean algebra, and algorithms.

## Prerequisite(s)

None

## Course Outcomes

Upon completing this course, you will be able to do the following:

- Recognize real life situations where mathematical models apply.
- Translate the real-life situations into mathematical models.
- Solve the mathematical models.
- Interpret the solutions in the context of the real-life situations.

## Course Requirements/Components

- Homework Assignments
- Exams

## Grading

The following grading scale will be used to evaluate all course requirements and to determine your final grade:

| Grade | Percentage <br> Range |
| :--- | :--- |
| A | $90 \%-100 \%$ |
| B | $80 \%-89 \%$ |
| C | $70 \%-79 \%$ |

| $D$ | $60 \%-69 \%$ |
| :--- | :--- |
| $F$ | $0 \%-59 \%$ |

| Evaluation Methods | Percentage <br> of final <br> grade |
| :--- | :--- |
| Homework Assignments | $20 \%$ |
| Exams 1 and 2 | $50 \%$ |
| Final Exam | $30 \%$ |
